

Section I. (Amendment of the Claims)

Cancel claims 1-30 and add new claims 31-45, as set out in the following listing of claims for the application.

Claims 1-30 (cancelled).

31. (new) A method of combating movement disorder in a patient experiencing or susceptible to such movement disorder during treatment of said patient with a dopaminergic medication, an anticonvulsant medication or an antianxiolytic medication, said method comprising administering to the patient an effective amount of mirtazapine.

32. (new) The method of claim 31, wherein said treatment of said patient comprises treatment with said dopaminergic medication.

33. (new) The method of claim 32, wherein said dopaminergic medication comprises a dopa agonist.

34. (new) The method of claim 32, wherein said dopaminergic medication comprises medication selected from the group consisting of:

- (i) levodopa,
- (ii) levodopa in combination with carbidopa, and
- (iii) ropirinole.

35. (new) The method of claim 31, wherein said treatment of said patient comprises treatment with said anticonvulsant medication.

36. (new) The method of claim 35, wherein said anticonvulsant medication comprises primidone.

37. (new) The method of claim 31, wherein said treatment of said patient comprises treatment with said antianxiolytic medication.

38. (new) The method of claim 37, wherein said antianxiolytic medication comprises propranolol.
39. (new) The method of claim 37, wherein said antianxiolytic medication comprises an SSRI.
40. (new) The method of claim 37, wherein said antianxiolytic medication comprises a benzodiazapine.
41. (new) The method of claim 31, wherein the movement disorder comprises bradykinesia.
42. (new) The method of claim 31, wherein the movement disorder comprises tremor.
43. (new) The method of claim 31, wherein the movement disorder comprises resting tremor.
44. (new) The method of claim 31, wherein the movement disorder comprises action tremor.
45. (new) A composition comprising:
 - (i) a dopaminergic medication, an anticonvulsant medication or an antianxiolytic medication, and
 - (ii) mirtazapine in an amount effective for combating movement disorder.
